Resources for sharing of PEEGS project deliverables

School Name: Ching Chung Hau Po Woon Primary School

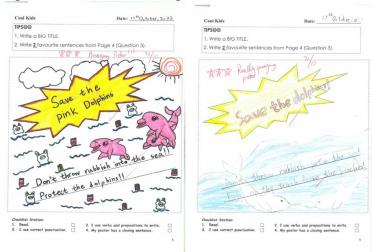

I. Programme Overview and Experience Sharing

1) Target development area	Promoting reading across the curriculum			
2) Target Level	P.3			
3) Skill Focus	Reading and Writing			
4) Programme Description	The PEEGS readers have been thematically paired with the PLP-R/W Programme readers in an effort to enrich and extend students' learning content and to promote reading across the curriculum. Students are encouraged to use English to learn about and discuss relatable topics by building on prior as well as cross-disciplinary knowledge – a case in point 'animal behaviour'. This module comprises four lessons, with one allocated to 'Cool Kids', the PLP-R reader, and the remaining three to 'Animals in Winter'.			
5) Experience Sharing	 Planning and curriculum development process The process of pairing and matching the readers took place over several years before reading a near-ideal curriculum. It is tempting to assume that non-fiction readers may be challenging for most students, but often they will surprise you with what they know and how they relate personal and prior knowledge to new ideas and concepts. It has been an eye-opening and humbling experience to develop a curriculum around the PEEGS readers that students have found engaging and enriching. Co-planning meetings with subject teachers are normally held weekly for NETs to introduce the upcoming lesson's content and for subject teachers to suggest ways to address their respective students' needs (e.g. classes that may need more time, visuals or examples to understand the concepts). Students' needs and responses Most reading and writing booklets for the modules (including this featured module) consist of one version for classes (which are streamed). Student diversity is addressed by adjusting the pace, instruction and by supplementing instructions with further visuals or examples. Overall, students enjoy learning about different animals, especially because most of the animals featured inhabit regions outside Hong Kong. This way, they learn more about the world and nature the exists in different parts of the world. 			
6) Search Keyword	#Primary 3 #hiberation / hibernate #reading #animal behaviour #animals in winter #behaviour #cool kids #seasons #pink dolphins #migration / migrate			

7) Student Work

Key end-products of the module (done by students) include:

• a promotional/educational poster (for Cool Kids), and

• a summary table (during which students read and summarise) of the features of animals' seasonal behaviour (e.g. hibernation)

II. Module / Activity Pack

Item	Resource				
1) Theme/Topic	a. Seasonal behaviour of animals (i.e. how animals survive				
,	through hibernation and migration)				
	b. Animals' habitats				
2) Module	Cool Kids and Animals in Winter				
2) Modute	Cool Kids and Allimais in written				
3) Skill Focus	a. locate the required information by identifying keywords from				
	questions and texts				
	b. decode and work out the meaning of words by using contexts				
	and knowledge of the world				
	c. recognise the format, visual elements and language features of				
	a text type (i.e. poster)d. identify details that support the main idea of the text (e.g. what				
	constitutes 'hibernation'? How is migration different from				
	normal travel?)				
	e. understand the use of simple cohesive devices to connect ideas				
	(e.g. and, but, or, he, them, my)				
4) Language Focus	a. Vocabulary:				
	o Names of winter/featured animals				
	o Concepts: survive, migrate, hibernate, cardinal				
	directions (north, south, etc.) o Animal's survival in winter: save/hunt for food,				
	Animal's survival in winter: save/hunt for food,b. Text type(s):				
	o features of a magazine (specially designed cover page,				
	content page, content variety, multiple authors,				
	'editions')				
	o features that make an attractive poster (slogans, large				
	titles, powerful illustrations or tell a story or send a				
	message)				
	c. Language Structures:				
	imperatives (for posters)descriptive language (what animals do, eat, where they				
	live and how they survive)				
5) 1	Th				
5) Learning and Teaching Resources	a. The magazine "Cool kids" from the PLP-R/W programmeb. The reader "Animals in Winter"				
Resources	c. Reading and writing booklet (school-based)

Item		Resource
6) Lesson flow /activity plan	a. Reading le	
		nter Animals and Cool Kids_lesson plan
	Session	tachment) Learning and Teaching Activities
	1	Students explore the magazine 'Cool Kids'
		• Teacher discusses the textual features of a
		magazine.
		• The lesson focuses on the article about
		'Hong Kong's Pink Dolphins' in 'Cool Kids'. Students complete comprehension
		questions based on the reading.
		Teacher then discuss features and purpose of
		posters, after which students design one to
		encourage protecting dolphins.
	2	Teacher introduces the non-fiction reader
		'Animals in Winter' and helps students
		contrast the genre with fiction.First section of reader:
		1. Silent reading: Students engage
		independently with reader and are given
		time to read, reflect and enjoy the
		visuals. Teacher checks how much students understand.
		2. Concept of migration is taught: word
		cards, picture cards and other
		illustrations are used to aid students'
		understanding. Video: Which other animals migrate (by air, sea,
		and over land)? Students watch and write the
		names of three animals (different from the
		readers).
	3	Second section of reader:
		1. Silent reading: Teacher shows Ss
		guiding questions. Students engage
		independently with reader and are given time to read, reflect and enjoy the
		visuals. Ss read independently before
		sharing answers.
		2. Concept of hibernation is taught: this
		section is rather visual and well- organised. Student first work
		independently on filling in the summary
		table about hibernation before shraring
		and discussing answers with a peers.
		Answers are then checked with the whole class. Student are encouraged to
		use their own words to note down the
		main ideas.
		• Video: Which other animals hibernate?
		Students watch and put a tick next to the
		pictures of animals featured in the video.
<u> </u>		

Item	Resource			
	 Third section of reader: **Divided into subsections – animals that save food vs animals that hunt for food. Silent reading (animals that save food):
