

# My Boat Can Float!

On a hot summer day, as Skipper opened the door,  
He spotted a piece of paper lying flat on the floor!

Drawn on the paper was a colourful little boat,  
No matter how much he tried, Skipper could not make the boat float!

Just then he remembered a little book with a colourful note,  
It had pictures of a floating paper boat.

Oh Yes! Skipper shrieked with joy, for he knew what to do.  
He ran to fetch some paper, tape, colours, and glue.

He opened the little book that told him how to fold and press,  
And turn a paper into a flower, a box, and even a dress!

He took the sheet of paper and its sides he slowly pressed,  
With a happy smile and a focused mind, he tried his very best.

Slowly and steadily his paper turned into a boat,  
And once it was ready, Skipper wanted it to float.

He ran to pick a big tub from the bathroom,  
He filled it with water, and carefully brought it to his room.

Will the boat sink in water or will it merrily slide?  
Skipper would not know, unless he tried!

Very gently in the water tub, Skipper put his little boat,  
He jumped with joy and danced, as he saw his little boat float!

Push along the perforated line to release the objects below.
